Eigenständigkeitserklärung

Hiermit versichere ich, dass ich die vorliegende Arbeit eigenständig ohne Hilfe Dritter und ausschließlich unter Verwendung der aufgeführten Quellen und Hilfsmittel angefertigt habe. Alle Stellen die den benutzten Quellen und Hilfsmitteln unverändert oder sinngemäß entnommen sind, habe ich als solche kenntlich gemacht.

Sofern generische KI-Tools verwendet wurden, habe ich Produktnamen, Hersteller, die jeweils verwendete Softwareversion und die jeweiligen Einsatzzwecke (z.B. sprachliche Überprüfung und Verbesserung der Texte, systematische Recherche) benannt. Ich verantworte die Auswahl, die Übernahme und sämtliche Ergebnisse des von mir verwendeten KI-generierten Outputs vollumfänglich selbst.

Die Satzung zur Sicherung guter wissenschaftlicher Praxis an der TU Berlin vom 8. März 2017. https://www.static.tu.berlin/fileadmin/www/10000060/FSC/Promotion___Habilitation/Dokumente/Grundsaeetze_gute_wissenschaftliche_Praxis_2017.pdf habe ich zur Kenntnis genommen. Ich erkläre weiterhin, dass ich die Arbeit in gleicher oder ähnlicher Form noch keiner anderen Prüfungsbehörde vorgelegt habe.

Abstract

This page is a placeholder for the abstract which should follow this structure:

1. State the problem
2. Say why it's an interesting problem
3. Say what your solution achieves
4. Say what follows from your solution

Additional information on how to structure the abstract can be found here: https://mboehm7.github.io/teaching/ws2122_isw/01_Introduction.pdf, slide 20.

Zusammenfassung

This is a placeholder for the german abstract (Kurzfassung) which should follow the same structure as the abstract.

Contents

1	Introduction	1
2	Background	3

	Appendix	17

1 Introduction

This chapter is a placeholder for the introduction of your thesis.

The first paragraph of the introduction should describe the *context*, followed by 1-3 paragraphs stating the *problems* that are solved in this thesis. The next paragraph should mention *existing work* before introducing the *idea* on how to solve the mentioned problems.

Contributions: In the last paragraph list your contributions and outline the thesis as a list of bullet points containing a short introduction into the chapters.

Additional information can be found here: https://mboehm7.github.io/teaching/ws2122_isw/01_Introduction.pdf, slide 21.

1 Introduction

2 Background

This section is intended to give an introduction about relevant terms and methods used in your work.

Start by outlining the content that will be presented in this chapter, referencing the individual sections.

Section 2.1 introduces method xyz, Section 2.2 gives an overview about abc.

Important: Ensure proper references of the mentioned approaches using the *cite* command in descending order e.g.: [1, 2].

2.1 Section Title 1

Always provide a paragraph outlining the content of the current section.

2.1.1 Sub Section Title 1

...

2.1.2 Sub Section Title 2

...

2.2 Section Title 2

...

2 *Background*

3 Experimental Evaluation of X

This chapter elaborates on the problem that this thesis tries to solve and explains the individual methods used for solving the problem.

3 *Experimental Evaluation of X*

4 Experiments

This chapter provides details about the experiments conducted within the context of this thesis.

4.1 Experimental Setup

All experiments are carried out on machine XYZ.

4.2 Results for Experiment A

Figure 4.1 illustrates the situation between Alice and Bob. (sequence diagram from www.websequencediagrams.com)

Figure 4.1: Alice and Bob

4.3 Results for Experiment B

In Table 4.1 the statistics for...

4 Experiments

Dateset	Minimum y	Maximum y	Average y
DS 1	-68.57	506.78	86.05
DS 2	-0.18	537.67	102.51

Table 4.1: This table shows the statistics (minimum, maximum, and average) for the different datasets.

5 Related Work

This chapter provides insights into additional related work that was not mentioned in the background chapter.

5 *Related Work*

6 Conclusions

This chapter summarizes the contributions of the thesis and provides an outlook into future work.
